

# Implementation and Improvement Science

## Made Simple

The evidence-based practice, intervention or program is  
**THE THING**

Clinical Research looks at whether  
**THE THING** works

Implementation Science looks at how best to help people do  
**THE THING**

Improvement Science helps people know they need  
**THE THING**

Implementation strategies (e.g. Active Implementation) are the stuff we do to try to help people do  
**THE THING**

Implementation outcomes are how much and how well they do  
**THE THING**

Improvement outcomes are the changes in student outcomes that we see as a result of using Implementation strategies to do  
**THE THING**
